

End-to-End HR Management and Support

Using the primeBENEFITS system to simplify employee benefits and engagement, we streamline the HR workflow for in-house systems, vendors, and compliance. This increases employee satisfaction and impacts critical areas like workforce development, benefits spending, and benefits plan performance.

Customized for your organization

By integrating employee, payroll, and benefit plan data, primeBENEFITS makes it easy for one or multiple stakeholders to execute the daily functions like onboarding, enrollment, HR administration, vendor maintenance and compliance.

Reduce manual and paper processes

With anytime cloud access to data, HR management and workforce analytics, primeBENEFITS eliminates the redundant and manual HR processes and enables users to shift focus to recruiting and managing the highest quality workforce.

Create revenue for HR technology systems

Unbundle the traditional broker-client relationship with voluntary benefit plans that capture revenue streams for technology credits. These credits can offset the cost of your system, plus future tech and HR costs.

Consultative Partnership

The primeFORCE team doesn't implement software and disappear. We're consultants with decades of experience in technology and insurance for K-12, large commercial and government organizations.

VALUE-ADDED SERVICES

- Customization for your HR processes and systems
- Custom carrier, vendor and payroll integration
- Individualized employee benefit and education features
- Benefit coverage analysis for best in class
- Personalized, dedicated and experienced support
